

Letter of recommendation for Maximiliano Dumont

Frontend developer internship at Filify

At Filify, we have been super happy to have Maximiliano as an intern for 2 months. He has been a pleasure to work with and created a good atmosphere in the office. Regarding his work, we strongly believe that he is ready to take a junior developer position, with his current knowledge of web development.

In the internship, Maximiliano has been working with Next.js, React, MUI, and Github. In two months, Maximiliano has developed enough knowledge to write production-ready code independently.

Unfortunately, we had to make a hire stop at Filify. Therefore we could not offer Maximiliano a part/full-time position after the end of his internship as expected.

Therefore we are happy to recommend Maximiliano since he is a fast and independent learner who can help any team reach its development goals.

For any questions regarding this recommendation, please feel free to contact me at the information below.

Best regards,
Asger Mathiasen, CEO
