Personal Statement

Knowledge of a wide variety of programming tools and languages of back-end and front-end development requirements. I am a dedicated person, with ambitions to learn and grow in the industry, the pursuit of knowledge and optimization is my personal goal I specialize in problem solving competently and analytically with calm and focused behavior, Capable of contributing to a highly collaborative workplace that is built on trust and kindness. finding solutions, improving the user experience as well as improving code, design, adaptability and maintainability through bug fixes and end-to-end testing it's my specialty.

Experience

Front-End Developer - intern

Filify

01/01/23 - 20/03/23   Rued Langgaards Vej 7, 2300 København

- Correct bugs and develop new functionality for the application using Next js and Mui.
- Update the front-end and server connection using queries created in GraphQL to optimize data requests.
- I was responsible for developing new features within the extension of the application where I had to.
  - Perform database connections using GraphQL
  - Create an entire interface to show users in charts exposing the relevant data
  - Work in different possibilities to cover situations where data is not relevant or altered.
  - Conduct a search system by applying different filters based on search preferences of related companies.
